

NETWORKS OF CENTRES OF EXCELLENCE PROGRAM

SOLVING PROBLEMS THROUGH PARTNERSHIP

Finding solutions to major social, economic or health issues calls for a collaborative approach and a wide range of research expertise. The Networks of Centres of Excellence (NCE) program harnesses the creativity and inventiveness of top Canadian health, natural, and social scientists and engineers. Large-scale, academically led national networks accelerate the creation and application of new knowledge in a specific research area.

NCEs unite researchers to focus on issues that are critical to Canadians, and to the world by:

- Mobilizing multi-disciplinary research capacity from across Canada
- Engaging partners from multiple academic institutions, industry, government and not-for-profit organizations
- Training the next generation of highly qualified people
- Working with end users to put new knowledge to use quickly
- Increasing collaboration between researchers in Canada and abroad

The Networks of Centres of Excellence program is part of the suite of partnership programs offered by the Networks of Centres of Excellence.
